## RELIEF PACKAGE INFORMATION

Horizon Energy Group, and its shareholder, the Eastern Bay Energy Trust, announced a relief package for customers in the Edgcumbe evacuation area affected by flooding.

Horizon Energy Group and its subsidiaries are committed to helping their customers and are offering a relief package to support:

- Domestic customers who have been evacuated and unable to access their properties for an extended period of time with a rebate on fixed line charges; and
- Those domestic customers who are uninsured and own their own homes with safety and repair assistance to help them through this challenging time.

Horizon Energy Group's domestic customer relief package includes:

- All domestic customers connected to the network as at 5 April 2017 in the Edgcumbe evacuation area will receive a rebate on their fixed line charges for a period of 20 days;
- Horizon Energy Group's wholly owned subsidiary ElectriServ, will be providing free safety inspections; and
- A credit of \$250, including GST, will be applied to the repair bill for all customers who undertake and complete their repair work with ElectriServ.

The relief package is designed to get people back into their houses safely, and if they choose to use ElectriServ for the repairs, they will receive a credit towards their repair. If the repairs are less than \$250, the customer incurs no further costs. The relief package is valued at over \$100,000 and is designed to support those most in need. All eligible domestic market customers will have the credit applied directly by their Retailer and are not required to apply for the rebate. Customers who want to have a safety inspection or repair work carried, should call ElectriServ on **0800 377 669** to register their details and confirm if they qualify for the relief package. Conditions apply.
